### QUESTION 1

In the Robotic Enterprise (RE) Framework, at which point should a developer log a clear message with the Logging Level set to "Information," adhering to the best practices for automating a production-level process?

- A. Whenever an exception is caught in a Catch block.
- B. Whenever data is fetched from external sources.
- C. Whenever an argument or value is used.
- D. Whenever the robot encounters an error on a Queue Item.

Correct Answer: B

---

### QUESTION 2

A developer is building a process that needs to click an element which requires a mouse hover to become visible. However, the element does not appear with the default click setting. The input method for the Click activity is Send Window

Message.

Which property should the developer configure to be able to click the element?

- A. The developer should change the input method to Simulate and the CursorMotionType to Instant.
- B. The developer should change the input method to Hardware Events and the CursorMotionType to Smooth.
- C. The property AlterIfDisabled should be set to False.
- D. The property AlterIfDisabled should be set to True.

Correct Answer: B

---

An animation on the web page never completely loads but the element indicated in the Click activity does load within the specified timeout duration. What occurs when this Click activity executes?

- A. Element is clicked once the element is fully loaded.
- B. Continues to the next activity after 30 seconds without clicking on the element.
- C. Waits 10 seconds before clicking on the element.
- D. Timeout error occurs without clicking on the element.

Correct Answer: A

---

#### **QUESTION 4**

What is the correct method to check how many resources are utilized in a personal workspace in UiPath Orchestrator?

- A. Navigate to Tenant > Folders, click the Personal Workspaces tab, and then click Manage Resources for the desired workspace.
- B. Navigate to Tenant > Folders, click the All Workspaces tab, and then click Check Resources for the desired workspace.
- C. Navigate to Tenant > Users, click the Personal Workspaces tab, and then click Resources for the desired workspace.
- D. Navigate to Tenant > Folders, click the Personal Workspaces tab, and then click See Usage for the desired workspace.

Correct Answer: D

---

#### **QUESTION 5**

What is a pre-requisite for running functional test cases in REFramework?

- A. Invoke Process XAML file
- B. Invoke SetTransactionStatus XAML file
- C. Invoke Main XAML file
- D. Invoke InitAllSettings XAML file

Correct Answer: D

---

#### **QUESTION 6**

What are the possible statuses after running any REFramework test case?

- A. MANUAL or AUTOMATIC.

- B. PASS or FAIL
- C. EXPECTED or ACTUAL.
- D. SUCCESS or EXCEPTION.

Correct Answer: B

---

### QUESTION 7

Consider testing a workflow that computes the sum of two numbers having the data driven test data from the Excel file below:

Number1	Number2	Sum
1	2	3
2	2	4
5	4	9

Expanding the functionality of the workflow to compute the sum of three numbers, the data needs to be updated as well to accommodate the new scenario:

Number1	Number2	Number3	Sum
1	2	2	5
2	2	3	7
5	4	1	10

What are steps to do that?

- A. Click Right on the Test Case and select Update Test Data.
- B. Click Right on the Test Case and select Add Test Data.
- C. Click Right on the Test Case and select Refresh Test Data.
- D. Click Right on the Test Case and select Remove Test Data.

Correct Answer: A

---

### QUESTION 8

What is the output type returned when using a Get Test Data Queue Item activity?

- A. QueueItem
- B. Object

C. Dictionary

Correct Answer: C

---

**QUESTION 9**

A developer configured the properties for a Click activity as shown below: What happens if the activity cannot find its target at runtime?

Properties

UiPath.UIAutomationNext.Activities.NClick

**Common**

Key modifiers	NKeyModifiers.None	▼	...	

- A. An exception is thrown after 10 milliseconds.
- B. An exception is thrown after 10 seconds.
- C. The next activity is executed after 10 seconds.
- D. The next activity is executed after 10 milliseconds.

Correct Answer: C

---

#### **QUESTION 10**

What are the primary functions of the UiPath Integration Service?

- A. Enables automation with a library of connectors, manages connections easily with standardized authentication, kicks off automations with server-side triggers or events, provides curated activities and events, simplifies automation design.
- B. Automates UI design, manages API connections, provides limited activities and events, simplifies automation design.
- C. Enables automation with API integration, manages connections with user-provided authentication, kicks off automations based on application-specific triggers, simplifies automation design with the help of third-party libraries.
- D. Enables automation with UI components, manages API keys, kicks off automations with client-side triggers, provides curated events.

Correct Answer: A

---

#### **QUESTION 11**

In a UiPath State Machine workflow, which section of State activity is used to specify conditional/triggers logic and multiple outgoing transitions in a state machine?

- A. Entry
- B. Transitions
- C. Triggers
- D. Exit

Correct Answer: B

---

#### **QUESTION 12**

Given the following workflow:

A\*B Assign

arr = {'apple pear orang

Expression Editor

Set value (String[])

1 "apple pear orange". "mango kiwi")

OK Cancel

A\*B Assign

arr = arr.SelectMany(Fu

Expression Editor

Set value (String[])

1 arr.SelectMany(Function(x)x.Split(" c)).ToArray()

OK Cancel

Log Message

Level

Message String.Join(", ", arr)

What will be the output of the Log Message activity?

- A. apple, pear, orange
- B. apple, pear, orange, mango, kiwi
- C. "apple pear orange", "mango kiwi"
- D. apple pear orange, mango kiwi

Correct Answer: B
