Vendor:UiPath

Exam Code:UIPATH-SAIV1

Exam Name:UiPath Specialized AI Professional v1

Version:Demo

QUESTION 1

What is the default visibility of an ML skill?

- A. An ML skill is by default public and can be made private.
- B. An ML skill is by default private and can be made public.
- C. An ML skill is by default public and can't be made private.
- D. An ML skill is by default private and can't be made public.

Correct Answer: B

Make ML Skill public/private You have the possibility to make an ML Skill public. Doing so, the ML Skill will be accessible via an endpoint from outside of UiPath environment. This means that you can call it without the need to go through a robot connected to the specific tenant.

QUESTION 2

Which technology enables UiPath Communications Mining to analyze and enable action on messages?

- A. Natural Language Processing (NLP).
- B. Virtual Reality.
- C. Cloud Computing.
- D. Robotic Process Automation (RPA).

Correct Answer: A

Natural Language Processing (NLP), is a field of Machine Learning focused on building tools that can automatically understand and process natural language data similarly to the way humans can.

A key focus of NLP tools is taking unstructured communications data and turning it into actionable structured data, by understanding the intents, themes and concepts within, and extracting key data points.

QUESTION 3

DRAG DROP

What is the order of steps for automatically retraining and deploying a Document Understanding ML Model in AI Center with data from Document Validation Action?

Instructions: Drag the steps found on the "Left" and drop them on the "Right" in the correct order.

Select and Place:

Steps

- Enable the Auto Update feature in the ML Skill.
- Use the Export feature from Document Manager using Scheduled Export.
- Run Training/Full Pipeline in AI Center using Scheduled Pipeline with Auto-Retraining enabled.
- Send Human in the Loop data to the used Dataset.

Order of Steps

- First
- Second
- Third
- Fourth

Correct Answer:

Steps

-
-
-
-

Order of Steps

- First: Use the Export feature from Document Manager using Scheduled Export.
- Second: Enable the Auto Update feature in the ML Skill.
- Third: Run Training/Full Pipeline in AI Center using Scheduled Pipeline with Auto-Retraining enabled.
- Fourth: Send Human in the Loop data to the used Dataset.

QUESTION 4

Which of the following are unstructured documents?

- A. Invoices, receipts, purchase orders, and medical bills.

- B. Banking forms, tax forms, surveys, and identity cards.
- C. Contracts, emails, banking forms, and tax forms.
- D. Contracts, agreements, and emails.

Correct Answer: D

QUESTION 5

Which of the following extractors can be used for Data Extraction Scope activity?

- A. Intelligent Form Extractor, Machine Learning Extractor, Logic Extractor, and Regex Based Extractor.
- B. Full Extractor, Machine Learning Extractor, Intelligent Form Extractor, and Regex Based Extractor.
- C. Form Extractor, Incremental Extractor, Machine Learning Extractor, and Intelligent Form Extractor.
- D. Regex Based Extractor, Form Extractor, Intelligent Form Extractor, and Machine Learning Extractor.

Correct Answer: D

QUESTION 6

What does the Label Trends table in UiPath Communications Mining show?

- A. How the top 10 labels for a given time period perform compared to the previous period and their change in rank.
- B. How the top 10 senders for a given time period perform compared to the previous period and their change in rank.
- C. How the top 10 entities for a given time period perform compared to the previous period and their change in rank.
- D. How the top 10 labels and entities for a given time period perform compared to the previous period and their change in rank.

Correct Answer: A

The label trends table shows you how the top 10 labels for a given time period perform compared to the previous period and their change in rank. The time series in scope is set by the user in the filter bar, and the time sequencing of the chart

(i.e. daily, weekly, etc.)

QUESTION 7

Which of the following is the main benefit of combining UiPath Communications Mining and Robotic Process Automation (RPA)?

- A. UiPath Communications Mining structures real-time calls data before handing it over to UiPath robots for automation.
- B. UiPath Communications Mining processes documents, then hands them over to UiPath robots for automation.

- C. UiPath Communications Mining processes images, then hands them over to UiPath robots for automation.
- D. UiPath Communications Mining structures conversational data before handing it over to UiPath robots for automation.

Correct Answer: D

QUESTION 8

Which is the most suitable extractor for extracting data from invoices from different customers?

- A. The Regex Based Extractor.
- B. The Machine Learning Extractor.
- C. The Form Extractor.
- D. The Intelligent Form Extractor.

Correct Answer: B

QUESTION 9

What action can be performed when using the User Interface to update a UiPath Communications Mining entity?

- A. Edit entity hierarchy.
- B. Clone entity.
- C. Change base entity.
- D. Merge with another entity.

Correct Answer: C

QUESTION 10

How can the code be tested in a development or testing environment in the context of the Document Understanding Process?

- A. Use them as a template to create other tests.
- B. Simply run the existing tests.
- C. Based on the use case developed, create test data to test existing and new tests.
- D. Based on the use case developed, create test data to test existing tests.

Correct Answer: C

QUESTION 11

What is the recommended number of documents per vendor to train the initial dataset?

- A. 5
- B. 10
- C. 15
- D. 20

Correct Answer: B

QUESTION 12

What is the use of BatchTestingUtilities?

- A. Run tests faster during development.
- B. Save test data faster and for easier debugging and development.
- C. Save data to cache during development and run tests faster.
- D. Save data to cache during development.

Correct Answer: A
